

BUS10.6 - Energy Conservation

B - Business

Objective:

The district is dedicated to conserving energy and promoting environmentally responsible practices to reduce operational costs and contribute to a sustainable future.

1. Energy Conservation Strategies:

The district will minimize the use of electricity, natural gas, water, and other resources by implementing an energy conservation program focused on reducing waste.

2. Environmental Education:

The district will promote a curriculum on energy conservation and sustainability, encouraging staff, students, and the community to participate in environmentally responsible activities such as recycling, carpooling, and using public transportation.

3. Sustainable Purchasing:

Products purchased by the district will be evaluated for their environmental impact, with a preference for durable, reusable, and non-toxic materials.
