

BUS11.1 - Authorized Use of School-Owned Materials and Equipment

B - Business

Objective:

School and nonschool entities may use District-owned materials and equipment, provided such use does not conflict with laws or district policies. The district will ensure that all usage is approved and that no unnecessary costs are incurred.

1. Approval Process:

The Superintendent will establish procedures for approving the use of district-owned materials or equipment. All requests must comply with district policies and relevant legal requirements.

2. Cost and Competition:

The district shall not incur any expenses due to nonschool entities' use of materials or equipment and will not compete with local businesses offering similar services or equipment. Rental fees will be charged unless the Superintendent waives, and all income will be deposited into the civic center fund. The Superintendent will report any fee waivers to the Board annually, with justifications.

3. Damage and Replacement:

Users will be responsible for any loss or damage to district-owned materials or equipment during their use and will be required to reimburse the district for repair or replacement costs.
